

I have been made aware that Low Power FM stations may be expanded in a way that may allow them to take priority over current FM translator services. This is a concern to me because K-LOVE is one of these current translators that could be forced off the air in my area.

There is no local station like K-Love. K-Love not only plays the music I listen to, but it also allows me to feel connected with the rest of the country. If K-Love were replaced by other programming, even if it played similar music, I would not have the same connection with others around the country and world.

K-Love is the only station I listen to. I never have to worry about the content of what my children hear while K-Love is playing in my car and the advice, skits, and many news updates are very helpful. Please do not do anything that may affect my K-Love station.

Thank you for the opportunity to voice my concerns.

Sincerely,  
Radina C. Petrik
